DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to a microelectronic assembly, classified in class 257, subclass 778.
 - II. Claims 20-24, drawn to a conductive element, classified in class 29, subclass 18.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 16 does not require the type of conductive element defined in claim 20. The subcombination has separate utility such as use in general purpose ball-bonding arrays.
